

## **LANGUAGE CERTIFICATE**

This is to certify that **Dr. FATEMEH DARVIZEH**, native English (American) speaker and one of the authors of the review article entitled “The role of gadoxetic acid-enhanced liver magnetic resonance imaging in the evaluation of hepatocellular carcinoma after locoregional treatment” by Gatti M et al, provided comprehensive editing services (amending, polishing and rewriting) for the above-mentioned manuscript.

The edit has achieved Grade A: no language polishing required after editing.

Should you require any additional information, please do not hesitate to contact her to the address:
