#### **SPECIFIC COMMENTS TO AUTHORS**

This is an interesting, unusual case. The manuscript has no particular flaws, and I agree to accept it in the present format.

#### **SPECIFIC COMMENTS TO AUTHORS**

This is a good paper with an important topic on orthopedics and related areas. Some grammatical issues need to be addressed during the editing process. Strangely the figure 1b (radiograph of right tibia) that authors pretend to be normal / with no changes, must be mistakenly inserted. I see there several screws and a plate indicating clearly a surgically treated fracture of fibula etc. Do you think Figure 1b is inserted wrong; or will you change its description / even inside the main text? For a person that has been training so hard, is usual to see increased values of CPK. Please insert these values of CPK in the manuscript, even if those have remained within norm.
