

8<sup>th</sup> July 2022

Dear Professor Vogl,

My apologies for the delay in responding, however I was on annual leave and not readily contactable.

Thank you so much for reviewing our research paper entitled: "Imaging volumes during COVID-19: A Victorian health service experience" (#76369). We were delighted with the reviewers' comments, and have made modifications as recommended.

We have included a further four recent references to update the manuscript and further enhance the discussion:

**Seghers MC**, Seghers VJ, Sher AC, Jadhav SP, States LJ, Trout AT, Alazraki AL, Sammer MBK. Working from home during the COVID-19 pandemic: surveys of the Society for Pediatric Radiology and the Society of Chiefs of Radiology at Children's Hospitals.

**Dann C**, Sun Z. The impact of COVID-19 on Western Australian medical imaging clinical practice and workplace.

**Goh Y**, Chua W, Lee JKT, Ang BWL, Liang CR, Tan CA, Choong DAW, Hoon HX, Ong MKL, Quek ST. Operational Strategies to Prevent Coronavirus Disease 2019 (COVID-19) Spread in Radiology: Experience From a Singapore Radiology Department After Severe Acute Respiratory Syndrome.

**Yeung P**, Pinson JA, Lawson M, Leong C, Badawy MK. COVID-19 pandemic and the effect of increased utilisation of mobile X-ray examinations on radiation dose to radiographers.

All authors have signed the Licensing Agreement, and we have a Powerpoint file containing all original data for the figures, except for one figure that was created in Canva®. This can be forwarded as a pdf, if requires further editing.

Please advise should you require any further information.

We look forward to hearing from you again soon.

Best wishes,

Mohamed Badawy PhD. (Email: [Mohamed.Badawy@monashhealth.org](mailto:Mohamed.Badawy@monashhealth.org))
