

## CERTIFICATE OF BIOSTATISTICS

To the Editors, World Journal of Gastroenterology

By this letter I confirm that I read the article by **Sergey Morozov and Tatyana Sentsova**, entitled **“Local inflammatory response to gastroesophageal reflux: association of gene expression of inflammatory cytokines with multichannel intraluminal pH-impedance data”** and checked eligibility of the statistical methods used in the study.

In my opinion, statistical methods are correct and appropriate for the mentioned research.

Please, contact me if you have any queries.

14-MAR-2022

Sincerely,

Alexey Artemov,  
Candidate of Physical and Mathematical Sciences,  
Researcher  
Skoltech,  
Center for Computational and Data-Intensive Science and Engineering
