

08/05/2022

The purpose of this letter is to verify that Zhongshan U-YES Translation Service CO. LTD provided the English proofreading services for the following thesis

When should Endo-GIA transection Glissonean pedicle not be used in hepatectomy? A case report and analysis

Authors:Jian Zhao

The basic language editing including the correction of grammar, punctuation and syntax was performed normatively with our best efforts. And the edited document was returned to the writer on 08/05/2022. We are unaware of any changes or additions made to the manuscript after that time. We have kept the specimen of the received original file in case of any legal dispute.

Sincerely,

Hemy Graff
