SPECIFIC COMMENTS TO AUTHORS

the authors presented a case of bilateral discoid Medial Meniscus and the manifestation of injury. There are a few issues that should be addressed by the authors before consideration for publication: 1.during the background, you should talk more about discoid meniscus, the presentation of tear, the difference in management. the foregoing article may help you: <https://doi.org/10.1002/jum.15955> 2.Line 33 and 94 you stated that "Apler" test in positive. Did you mean "Apley" test? I revised the manuscript grammatically using track changes. please find the attached.

SPECIFIC COMMENTS TO AUTHORS

Manuscript title Discoid Medial Meniscus of Both Knees: A case report 1 Title. The title reflects the main subject/hypothesis of the manuscript 2 Abstract. the abstract summarizes and reflects the work described in the manuscript Line 26:- the discoid meniscus is not an anatomical variant, it is a congenital anomaly as written down thankfully in the introduction, please change this phrase Line 33:- Apler test. I think you mean Apley's test, same in line 95 3 Keywords. Sufficient and reflect the focus of the manuscript 4 Background. Line 71:- I suggest changing the word "under arthroscopy" by arthroscopically or by arthroscopy Line 70-77: carries repeated data, I suggest summarizing it The introduction didn't show us how rare is this case in the literature. 5 CASE PRESENTATION The finding of the MRI examination need to be written more precisely with describing how the diagnosis of the discoid meniscus was made? Line 121 I think here it is better to express menisci reformation by saucerization as it is commonly described in the literature 6 Discussion Generally is relatively long but covers the literature very well Line 143 Please replace "medial disc meniscus" with Discoid medial meniscus Line 183 "Murphy test," I think the authors mean McMurray's test Line 188-189 "fracture, 3 cases of barrel-handle tear, 1 case of transverse fracture," you mean 10 cases of lamellar tears, 3 cases of Bucket-handle tear, 1 case of horizontal tear, I suggest adding a paragraph o the classification of the discoid meniscus, and whether the medial meniscus is classified as the lateral one or has a different classification? 7 Figures Arthroscopic figures after saucerization and partial meniscectomy have to be added to the manuscript
