SPECIFIC COMMENTS TO AUTHORS

The authors reported an interesting case of posterior mediastinal extralobar pulmonary sequestration who was initially misdiagnosed as a neurogenic tumor. There are a few issues that should be addressed by the authors before consideration for publication: ----- 1. The authors should explain how their findings make a difference for the readers of the World Journal of Clinical Cases? 2. Improvements to the English language within your manuscript are requested. 3. you didn't reference your claims during the introduction section. During the introduction part you should reference all the statements. You can use the foregoing article: doi: 10.1186/s12893-021-01121-6 4. The initial three paragraph of discussion are about introduce the pulmonary sequestration, its history, prevalence and the possible etiology which are actually belonged to introduction part not discussion
