

Dear reviewers,

Thank you for taking your time to review our submitted manuscript entitled, "Cardiac Risk Factors Limiting Survival to Liver Transplantation in Patients with Nonalcoholic Fatty Liver Disease." Your feedback was appreciated, and useful in formulating our manuscript revision. Specifically, I updated the tables as requested to comply with the required specifications, including the standard three-line table format. I edited the tables to create uniformity and cohesion between the tables. I hope you will find the revised manuscript satisfactory for publication. I look forward to hearing your response.wer

Sincerely,

Michael Delicce, MD
