*Comment: na*
- The condition of the patient/s after treatment and subsequent progress have been described adequately.  
*Comment: na*
- The diagnosis has been presented clearly.  
*Comment: na*
- The history of the presenting condition (and/or other relevant history) has been described adequately and in a chronological order.  
*Comment: na*

Assignment:  
SHEQRW-1

This report summarizes the overall quality of your edited manuscript. For each section, we provide specific comments on the quality and these are substantiated by examples (where available)

- The patient description in this case report is adequate.  
*Comment: na*
- The treatment and outcome have been described clearly and adequately.  
*Comment: na*

### Discussion

- The content presented in the Discussion section is appropriate and does not repeat information from the Results section.  
*Comment: na*
- There are no generalizations beyond the findings of this investigation.  
*Comment: na*
- The conclusions are clear.  
*Comment: na*
- The discussion is of appropriate length.  
*Comment: na*
- All key results are discussed in light of whether they did or did not support the hypothesis, and the discussion is convincing.  
*Comment: na*

## Peripheral Text Review

### Figures and/or Tables

- Every figure and/or table can stand alone without reference to the main text.  
*Comment: na*
- The Figures and Tables complement the main text, without any discrepancy.  
*Comment: na*
- The legends are complete and accurate.  
*Comment: na*
- They are cited in the main text at appropriate places.  
*Comment: na*

### Bibliography

- All references cited follow a consistent format.  
*Comment: na*
- The literature cited is very pertinent to the investigation.  
*Comment: na*
- Most statements of fact have supporting references.  
*Comment: na*

Assignment:  
SHEQRW-1

This report summarizes the overall quality of your edited manuscript. For each section, we provide specific comments on the quality and these are substantiated by examples (where available)

## Content, Terminology, Style, and Format Review

### Content

- There are no gaps in content in this paper.

*Comment: na*

- Where applicable, the necessary information has been added.

*Comment: na*

### Terminology

- The scientific nomenclature (gene names, protein names) is in order throughout the text.

*Comment: na*

- The scientific terminology and representation in the paper are appropriate and consistent.

*Comment: na*

- The terms used in the paper are valid in the field.

*Comment: na*

### Style

- The capitalization/italicization/number style follows conventions of the subject area.

*Comment: na*
