SPECIFIC COMMENTS TO AUTHORS

Firstly, thank you for opportunity to review very interested article. I don't feel qualified to judge about the English language and style due to not native language. 1. The title reflect the main subject about inflammation role in gastrointestinal oncology, title was clear and easy to understand. 2. The abstract summarize and reflect the work described in the manuscript. 3. The key words reflect the focus of the manuscript. 4. The letter to editor adequately describe the objective to communicated. The interleukin in colorectal cancer was raised to discussion with evidence from previous study. 5. The manuscript interpret the findings adequately and appropriately, highlighting the key points concisely, clearly, and logically. 6. The manuscript cite appropriately the latest, important and authoritative references in the introduction and discussion sections.

SPECIFIC COMMENTS TO AUTHORS

Gastrointestinal cancers are systematic tumors with the largest number of patients in the world. Interestingly, chronic inflammatory responses promoted tumorigenesis and development, while acute inflammation is currently considered to inhibit tumor progression. The authors highlight the possibility that chronic validation and acute inflammation may have different roles in the development of colonic cancer. This is an intriguing point. However, the authors should have provided more evidence to support this view.

SPECIFIC COMMENTS TO AUTHORS

This article discusses the role of inflammation in the oncogenesis of gastrointestinal tumors and is in response to a previously published other article. The article contains references to modern sources. A reference to the literature source should be added to the phrase "chronic inflammatory responses promoted tumorigenesis and development, while acute inflammation is currently considered to inhibit tumor progression." This is an important conclusion and should be supported by published data. In addition, it is recommended that some sentences, especially in the abstract, be corrected to improve the quality of the information.
