SPECIFIC COMMENTS TO AUTHORS

Tanaka et al. reported an interesting case of delayed Immune-Related Sclerosing Cholangitis After Discontinuation of Pembrolizumab. The case is original and no other similar case exist on the literature to date. The paper is concise, well written and well documented including immunological, imaging and histopathologic data allowing to exclude alternative diagnosis, especially chemotherapy-induced SP. Despite no conclusion can be made based on only one case report, this report contribute to improve knowledge about delayed irAEs after ICIs. I have no major or minor comments.

SPECIFIC COMMENTS TO AUTHORS

Very interesting clinical case, will help to expand the understanding of irAEs.
