

PEER-REVIEW REPORT

Name of journal: *World Journal of Gastrointestinal Surgery*

Manuscript NO: 77229

Title: Nomogram established by inflammatory markers predicting overall survival after radical resection of gastric cancer

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 02729532

Position: Editorial Board

Academic degree: MBBS, MS

Professional title: Professor

Reviewer's Country/Territory: India

Author's Country/Territory: China

Manuscript submission date: 2022-09-20

Reviewer chosen by: AI Technique

Reviewer accepted review: 2022-09-20 11:33

Reviewer performed review: 2022-09-25 10:30

Review time: 4 Days and 22 Hours

SPECIFIC COMMENTS TO AUTHORS

Research topic is good. However the language needs improvement. Also, the References section needs to be in uniform styling

SPECIFIC COMMENTS TO AUTHORS

This is an interesting manuscript. This reviewer suggests some revisions to improve the quality and understanding. 1.-All indexes used must be described to some extent highlighting the role of each in the pathological process of gastric cancer. This would be very useful to understand they were selected. 2.- The authors must state if comorbidities were taken into account, and if so, which ones. It is well known that some comorbidities particularly, autoimmune diseases, and some metabolic diseases can clearly bias the indexes studied. 3.-Thre are a lot of grammar in the manuscript. English must be revised.
