	<b>First decision:</b> 2022-05-30 07:48	
	Editorial Office's Comments	
	Science Editor: Remind Revision at 2022-06-07 08:18	
	Company Editor-in-Chief: I have reviewed the Peer-Review	
	Report, the full text of the manuscript, and the relevant ethics	
	documents, all of which have met the basic publishing requirements	
	of the World Journal of Clinical Cases, and the manuscript is	
	conditionally accepted. I have sent the manuscript to the author(s)	
	for its revision according to the Peer-Review Report, Editorial	
	Office's comments and the Criteria for Manuscript Revision by	
	Authors. Before final acceptance, uniform presentation should be	
	used for figures showing the same or similar contents; for example,	
	"Figure 1 Pathological changes of atrophic gastritis after treatment.	
2	A:; B:; C:; D:; E:; F:; G:". Please provide the original	[Y ]
	figure documents. Please prepare and arrange the figures using	
	PowerPoint to ensure that all graphs or arrows or text portions can	
	be reprocessed by the editor. In order to respect and protect the	
	author's intellectual property rights and prevent others from	
	misappropriating figures without the author's authorization or	
	abusing figures without indicating the source, we will indicate the	
	author's copyright for figures originally generated by the author,	
	and if the author has used a figure published elsewhere or that is	
	copyrighted, the author needs to be authorized by the previous	
	publisher or the copyright holder and/or indicate the reference	
	source and copyrights. Please check and confirm whether the

7041 Koll Center Parkway, Suite 160, Pleasanton, CA 94566, USA **Telephone:** +1-925-399-1568 E-mail: bpgoffice@wjgnet.com https://www.wjgnet.com

figures are original (i.e. generated de novo by the author(s) for this paper). If the picture is 'original', the author needs to add the following copyright information to the bottom right-hand side of the picture in PowerPoint (PPT): Copyright ©The Author(s) 2022. Before final acceptance, when revising the manuscript, the author must supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply a new tool, the RCA. RCA is an artificial intelligence technology-based open multidisciplinary citation analysis database. In it, upon obtaining search results from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles, which can then be used to further improve an article under preparation/peer-review/revision. Please visit our RCA database for more information at: https://www.referencecitationanalysis.com/. Comments of 06283805: 1. diagnosis was amended to a 26-week TRAP sequence stage Iib. Comment : I don't know or hear if TRAP Sequence have any staging like TTTS i.e. Quintero Staging, please correct if I am wrong 2. The acardiac twin was 7.5cm at the longest length, and the pump twin showed fetal distress with PSV-MCA = 1.6MOM. Comment : there are many literature mention about the weight of acardiac twin can be calculated based on the measurements in 3 dimensions, using the formula of the prolate ellipsoid (V=pi/6 \* length \*anterior posterior diameter\*width in cm3 or grams) not only

## Baishideng Publishing

7041 Koll Center Parkway, Suite 160, Pleasanton, CA 94566, USA **Telephone:** +1-925-399-1568 E-mail: bpgoffice@wjgnet.com https://www.wjgnet.com

one measurement like longest length, and I don't agree about diagnose a fetal distress with PSV-MCA above 1.5 MoM, it cant be like that I thing, you must mention about ductus venosus a wave, or umbilical arteries or vein doppler, or CPR ratio, or biophysical components 3. We performed emergency profile laser photocoagulation of the acardiac twin's umbilical cord (26 weeks GA) Comment : many literature suggest laser coagulation only for below 20 weeks GA, because above 20 weeks the cord become thick, laser likely to fail, please explain me and give your reason, why you choose the laser coagulation for 26 weeks GA, and you don't mention about the device you used for laser or camera system, about the energy (Watts), how many seconds to shot, how many times your wait until asystole for acardiac twin, how many sites you coagulated, and what micronmeter the laser fiber you used to coagulate, and how you access the amniotic cavity, which trocar you used, and are you use saldinger technique or not, do you performed the amnioinfusion before or not, and what kind tocolytic you used in this patient? 4. Fetoscopy is a new and effective treatment for this condition Comment : I don't agree with that statement, not fetoscopy, this only camera system to view the inside womb, not for the treatment 5. The intrauterine fetal intervention was necessary when the pump twin showed signs of fetal distress Comment : in Europe centers they offer fetal therapy for TRAP Sequence from 16 weeks GA, in US centers offer fetal theray once the size of acardiac twin exceeds 50% of the size of the pump twin.

3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	[Y]
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y ]
	The authors' full family (sur)names and full/abbreviated first	
6	names are listed on the title page and are consistent with those	[Y]
	listed in the signed BPG Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang	
7	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	[Y]
	research study; Wang CL, Zou CC, Hong F and Wu XM performed	
	the research; Xue JZ and Lu JR contributed new reagents and	
	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and	
	Wang CL, Liang L and Fu JF wrote the manuscript. All authors	
	have read and approve the final manuscript."	
	The 'Supported by' statement describes the source(s) of financial	
8	support and includes the corresponding identification number(s)	[N ]
	and program ID(s) if available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding	
	author's full first and family (sur)names, abbreviated title (e.g., MD,	
9	PhD), affiliated institute's name and complete postal address	[Y]
	(including zip code) and e-mail (written in all lowercase), and	
	contains no spelling errors.	

	-	
10	The Manuscript Tracking information ( <i>i.e.</i> , Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.	[Y ]
11	The Abstract section is formatted according to the article-specific style (structured <i>vs</i> unstructured) and word count thresholds, as follows: <u>Commentary, Frontier, Diagnostic Advances, Medical Ethics,</u> <u>Minireview, Review, Therapeutics Advances, and Topic Highlight</u> : Non-structured abstract that is no less than 200 words. <u>Field of Vision, Case Report and Letter to the Editor</u> : Non-structured abstract that is no less than 150 words. <u>Research articles</u> : Structured abstract with subsections for AIM (no more than 20 words); METHODS (no less than 80 words); RESULTS (no less than 120 words); and CONCLUSION (no more than 26 words).	[Y ]
12	The 'Key words' list provides 5-10 keywords that reflect the main content of the study. The first letter of each keyword is capitalized, and each keyword is separated by a semicolon.	[Y]
13	The "citation" contains authors' names and manuscript title. The name of the first author should be typed in bold letters; the family (sur) name of all authors should be typed with the first letter capitalized, followed by their abbreviated first and middle initials. For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM, Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes mellitus increases the risk of gastric cancer: A meta-analysis. <i>World J</i> <i>Gastroenterol</i> 2019; In press	[Y ]
14	The 'Core tip' provides a summary (less than 100 words) of the study that outlines the most innovative and important arguments	[Y ]

	and core contents of the paper and will serve to effectively attract	
	readers.	
	The 'INTRODUCTION' section clearly describes the relevant	
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
15	with the full name of abbreviations given upon first appearance in	[Y ]
10	the text and the abbreviation presented in parentheses [i.e.,	[1]
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately	
16	describes all materials and methods used to obtain the data	[N ]
16	presented in the article and is adequate for a reader to repeat the	
	study.	
	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have	
	scientific significance are emphasized. Data is presented in either	
17	the text, a table or figure (i.e., chart, diagram, graph or image), but is	[N]
	not repeated among each. Information presented in the tables and	
	figures clearly describes the trends, meaning, and inferences.	
	Results described in textual form are accurate, concise and clear.	
18	Statistical symbols are accurate. Statistical significance is expressed	
	as ${}^{a}P < 0.05$ , ${}^{b}P < 0.01$ ( $P > 0.05$ usually does not need to be denoted).	
	If there are other series of <i>P</i> values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	[N]
	and a third series of <i>P</i> values is expressed as ${}^{e}P < 0.05$ and ${}^{f}P < 0.01$ .	
	Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.	

	The 'DISCUSSION' section (1) describes the main purpose and	
10	hypothesis of the study; (2) summarizes the most important results;	
	(3) illustrates and explains the results (but does not simply repeat	
	the data) and draws conclusions or inferences based on the results;	D(1
19	(4) points out the limitations of the study and their impact on the	[Y]
	results, as well as proposes further advice on future research	
	topic(s) or direction(s); and (5) describes the theoretical significance	
	and practical value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
	individuals or organizations for technical support (i.e., providing	
20	instrumentation, equipment or experimental materials, and/or	
20	assistance in experimental work), non-technical services (i.e., useful	[N]
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	
21	The 'ARTICLE HIGHLIGHTS' section provides comments for	INT 1
21	original articles in accordance with the specified format.	[N ]
	The 'REFERENCES' section lists the references in the Vancouver	
	style. This style uses Arabic numeral in-text citations based on the	
	order of the first appearance of a source in the text. For citations	
	where the author's name is indicated in the text, a superscript	
	number should be placed following the name ( <i>i.e.</i> , "Pang <i>et al</i> "). For	
	citations where no author is indicated, a superscript number should	
22	be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup>	[Y ]
	reported", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a high	
	sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the	
	reference number is described in the text; for example, "The	
	experimental method used has been described in reference [8]." The	
	style of reference citations in tables is the same as that in the text	
	( <i>e.g.</i> , Pan <i>et al</i> <sup>[2-5]</sup> , please see reference [8]).	
	1	

Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazini); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version.[Y]24The number of cited references is appropriate for the article type, as follows: Commentary: no less than 50; Review; no less than 100; Article: no less than 100; Article: no less than 100; Case Report and Letter to the Editor; no less than 1.[Y]25The ethics-related statements are provided in accordance with the manuscript type (e.g., P-Reviewer: Hugot D S-Editor: Wang ID).[N]26The names of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang ID).[Y]27The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, ×, +, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A:; B:; C:; D:; E:; E:[Y]28Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis[Y]
