	General Information of the Manuscript	
	Name of journal: World Journal of Clinical Cases	
	Manuscript NO.: 77461	
1	Column: Minireviews	[]/[]
1	Title: Clinical Presentation, Management, Screening and Surveillance for	[Y]
	Colorectal Cancer during the COVID-19 Pandemic: Literature Review	
	Authors: Sami Akbulut, Abdirahman Sakulen Hargura, Ibrahim Umar Garzali,	
	Ali Aloun and Cemil Colak	

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	<b>Reviewer code:</b> 05774529, and 06048170	
	First decision: 2022-05-28 23:04	
	Editorial Office's Comments	
	Science Editor:1. Please provide point to point answer to all reviewers.	
	Authors should revise their article according to the reviewers'	
	comments/suggestions and provide point-by-point responses to each in a letter	
	that is to accompany their resubmission2. Please sign copyright online.	
	https://www.f6publishing.com/Forms/Manuscript/public/checkcopyright.asp	
	x?msid=2DD1D653EB76807C&aid=E19228AB69D1E0543. For manuscripts	
	submitted by non-native speakers of English, please provided language	
	certificate by professional English language editing companies. And the date	
	should be after May 29, 2022. Please upload the documents mentioned in the	
	format of zip.	
2	Company Editor-in-Chief: I recommend the manuscript to be published in the	[Y]
	World Journal of Clinical Cases. Before final acceptance, the author(s) must add a	
	table/figure (medical imaging) to the manuscript. There are no restrictions on the	
	figures (color, B/W). Before final acceptance, when revising the manuscript, the	
	author must supplement and improve the highlights of the latest cutting-edge	
	research results, thereby further improving the content of the manuscript. To this	
	end, authors are advised to apply a new tool, the RCA. RCA is an artificial	
	intelligence technology-based open multidisciplinary citation analysis database.	
	In it, upon obtaining search results from the keywords entered by the author,	
	"Impact Index Per Article" under "Ranked by" should be selected to find the latest	
	highlight articles, which can then be used to further improve an article under	
	preparation/peer-review/revision. Please visit our RCA database for more	

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	information at: https://www.referencecitationanalysis.com/.	
3	The fixed headings are copied.	[Y]
4	The title concisely summarizes the main topic of the study and is not too long (no more than 18 words). Words such as 'exploration', 'research', 'analysis', 'observation', and 'investigation' are avoided. The title does not start with 'The' and does not include any Arabic numbers or uncommon abbreviations.	[Y]
5	A short running title is provided (no more than 6 words).	[Y]
6	The authors' full family (sur)names and full/abbreviated first names are listed on the title page and are consistent with those listed in the signed BPG Copyright License Agreement form.	[Y]
7	The 'Author contributions' passage describes the specific contribution(s) made by each author. The author's names are listed in the following format: full family (sur)name followed by abbreviated first and middles names.  e.g., "Wang CL and Liang L contributed equally to this work; Wang CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and approve the final manuscript."	[Y]
8	The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors.	[N]
9	The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title (e.g., MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.	[Y]
10	The Manuscript Tracking information ( <i>i.e.</i> , Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.	[Y]

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	T	
	The Abstract section is formatted according to the article-specific style (structured	
	<i>vs</i> unstructured) and word count thresholds, as follows:	
	Commentary, Frontier, Diagnostic Advances, Medical Ethics, Minireview,	
	Review, Therapeutics Advances, and Topic Highlight: Non-structured abstract	
11	that is no less than 200 words.	F2/1
11	Field of Vision, Case Report and Letter to the Editor: Non-structured abstract that	[Y]
	is no less than 150 words.	
	Research articles: Structured abstract with subsections for AIM (no more than 20	
	words); METHODS (no less than 80 words); RESULTS (no less than 120 words);	
	and CONCLUSION (no more than 26 words).	
	The 'Key words' list provides 5-10 keywords that reflect the main content of the	
12	study. The first letter of each keyword is capitalized, and each keyword is	[Y]
	separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The name of the first	
	author should be typed in bold letters; the family (sur) name of all authors should	
	be typed with the first letter capitalized, followed by their abbreviated first and	
13	middle initials. For example, an article by Jae Moon Yoon, Ki Young Son, Chun	[Y]
	Sick Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM, Son KY,	
	Eom CS, Durrance D, Park SM. Pre-existing diabetes mellitus increases the risk of	
	gastric cancer: A meta-analysis. World J Gastroenterol 2019; In press	
14	The 'Core tip' provides a summary (less than 100 words) of the study that	
	outlines the most innovative and important arguments and core contents of the	[Y]
	paper and will serve to effectively attract readers.	

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and current (within the past 5 years) literature is cited, with the exception of rare instances of seminal literature citations. All technical terms and/or abbreviations are explained and/or defined, with the full name of abbreviations given upon first appearance in the text and the abbreviation presented in parentheses [i.e., "computed tomography (CT)"]. First-person pronouns (e.g., Tr, 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully.  The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.  The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure (i.e., chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.  Statistical symbols are accurate. Statistical significance is expressed as *P < 0.05, *P < 0.01 (P > 0.05 usually does not need to be denoted). If there are other series of P values, *P < 0.05 and *P < 0.01 are used, and a third series of P values is expressed as *P < 0.05 and *P < 0.01 are used, and a third series of P values is expressed as *P < 0.05 and *P < 0.01. Statistical data is expressed as mean ± SD or mean ± SE.  The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat

	the findings.	
20	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support ( <i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services ( <i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.	[N]
21	The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.	[N]
22	The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name ( <i>i.e.</i> , "Pang <i>et al</i> "). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup> reported", "Pan <i>et al</i> <sup>[2-5]</sup> indicated"; "PCR has a high sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text ( <i>e.g.</i> , Pan <i>et al</i> <sup>[2-5]</sup> , please see reference [8]).	[Y]
23	Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the	[Y]

	information relevant to the electronic version.	
	The number of cited references is appropriate for the article type, as follows:	
	Commentary: no less than 50;	
24	Review: no less than 100;	[Y]
	Article: no less than 30/26;	
	Case Report and Letter to the Editor: no less than 1.	
	The ethics-related statements are provided in accordance with the manuscript	
25	type (e.g., Manuscript NoInstitutional review board statement, Manuscript	[Y]
	NoAnimal care and use statement, etc.).	
	The names of the peer reviewers and the scientific editor are present at the end of	
<b>26</b>	the paper ( <i>e.g.</i> , P-Reviewer: Hugot D S-Editor: Wang JL).	[Y]
	The order and numerical labeling of tables and figures is consistent with their	
	appearance and presentation in the text. Symbols in tables (e.g., $+$ , $-$ , $\times$ , $\div$ , $*$ )	
	correctly correspond to the definitions in the footnotes. Only one legend is	
27	provided for each multi-panel figure consisting of color graphs, black and white	[Y]
_,	graphs, or line graphs that depicts data of the same theme. For example: <b>Figure 1</b>	1 + 1
	Pathological changes in atrophic gastritis tissue before and after treatment. A:;
