SPECIFIC COMMENTS TO AUTHORS

1. During the pandemic, the management of colorectal cancer is the biggest problem, especially "Surgical Treatment". I suggest that authors add more references, such as "Liu Z, Zhang Y, Wang X, Zhang D, Diao D, Chandramohan K, Booth CM. Recommendations for Surgery During the Novel Coronavirus (COVID-19) Epidemic. Indian J Surg. 2020 Apr 11:1-5. doi: 10.1007/s12262-020-02173-3. 2. Screening for colorectal cancer varies widely from country to country, and for developing countries, cost-effectiveness and accessibility of screening tools need to be considered. 3. Due to the impact of the epidemic, whether neoadjuvant therapy has been overused? Whether it has an impact on the prognosis of patients? This is also what needs to be discussed. 4. Some standardized treatments do not need to be elaborated, and the manuscript should focus on changes in the pandemic.

SPECIFIC COMMENTS TO AUTHORS

This is a review article to address Clinical Presentation, Management, Screening and Surveillance for Colorectal Cancer during the COVID-19 Pandemic. This review was conducted to analyze the impact of the COVID-19 pandemic on the management of colorectal cancer and to identify the changes made to adapt to the COVID-19 pandemic. That is interesting and helpful.
