	General Information of the Manuscript	
	Name of journal: World Journal of Clinical Cases	
	Manuscript NO.: 77633	
	Column: Case Report	
	Title: Survival of a patient who received extracorporeal membrane	
1	oxygenation due to postoperative myocardial infarction: A case	[Y]
	report	
	Authors: Qian-Qian Wang, Yi Jiang, Jian-Gang Zhu, Ling-Wei	
	Zhang, Hong-Jie Tong and Peng Shen	
	Reviewer code: 03846820, 05504262, and 03846820	
	First decision: 2022-08-21 10:41	

	Editorial Office's Comments	
	Science Editor: Remind Revision at 2022-08-29 08:18	
	Company Editor-in-Chief: I have reviewed the Peer-Review	
	Report, the full text of the manuscript, and the relevant ethics	
	documents, all of which have met the basic publishing requirements	
	of the World Journal of Clinical Cases, and the manuscript is	
	conditionally accepted. I have sent the manuscript to the author(s)	
	for its revision according to the Peer-Review Report, Editorial	
	Office's comments and the Criteria for Manuscript Revision by	
	Authors. Before final acceptance, uniform presentation should be	
	used for figures showing the same or similar contents; for example,	
	"Figure 1 Pathological changes of atrophic gastritis after treatment.	
2	A:; B:; C:; D:; E:; F:; G:". Please provide the original	[Y]
	figure documents. Please prepare and arrange the figures using	
	PowerPoint to ensure that all graphs or arrows or text portions can	
	be reprocessed by the editor. In order to respect and protect the	
	author's intellectual property rights and prevent others from	
	misappropriating figures without the author's authorization or	
	abusing figures without indicating the source, we will indicate the	
	author's copyright for figures originally generated by the author,	
	and if the author has used a figure published elsewhere or that is	
	copyrighted, the author needs to be authorized by the previous	
	publisher or the copyright holder and/or indicate the reference	
	source and copyrights. Please check and confirm whether the	
	figures are original (i.e. generated de novo by the author(s) for this	

paper). If the picture is 'original', the author needs to add the	
following copyright information to the bottom right-hand side of	
the picture in PowerPoint (PPT): Copyright ©The Author(s) 2022.	
Please upload the approved grant application form(s) or funding	
agency copy of any approval document(s). Before final	
acceptance, when revising the manuscript, the author must	
supplement and improve the highlights of the latest cutting-edge	
research results, thereby further improving the content of the	
manuscript. To this end, authors are advised to apply a new tool,	
the RCA. RCA is an artificial intelligence technology-based open	
multidisciplinary citation analysis database. In it, upon obtaining	
search results from the keywords entered by the author, "Impact	
Index Per Article" under "Ranked by" should be selected to find the	
latest highlight articles, which can then be used to further improve	
an article under preparation/peer-review/revision. Please visit our	
RCA database for more information at:	
https://www.referencecitationanalysis.com/.	
3 The fixed headings are copied. [Y]	
The title concisely summarizes the main topic of the study and is	
not too long (no more than 18 words). Words such as 'exploration',	
4 'research', 'analysis', 'observation', and 'investigation' are avoided. [Y]	
The title does not start with 'The' and does not include any Arabic	
numbers or uncommon abbreviations.	
5 A short running title is provided (no more than 6 words). [Y]	
The authors' full family (sur)names and full/abbreviated first	
6 names are listed on the title page and are consistent with those [Y]	

7	The 'Author contributions' passage describes the specific contribution(s) made by each author. The author's names are listed in the following format: full family (sur)name followed by abbreviated first and middles names. <i>e.g.,</i> "Wang CL and Liang L contributed equally to this work; Wang CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and approve the final manuscript "	[Y]
8	have read and approve the final manuscript." The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors.	[Y]
9	The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title (<i>e.g.</i> , MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.	[Y]
10	The Manuscript Tracking information (<i>i.e.</i> , Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.	[Y]
11	The Abstract section is formatted according to the article-specific style (structured <i>vs</i> unstructured) and word count thresholds, as follows: <u>Commentary, Frontier, Diagnostic Advances, Medical Ethics,</u> <u>Minireview, Review, Therapeutics Advances, and Topic Highlight</u> : Non-structured abstract that is no less than 200 words. <u>Field of Vision, Case Report and Letter to the Editor</u> :	[Y]

	Non-structured abstract that is no less than 150 words.	
	Research articles: Structured abstract with subsections for AIM (no	
	more than 20 words); METHODS (no less than 80 words); RESULTS	
	(no less than 120 words); and CONCLUSION (no more than 26	
	words).	
	The 'Key words' list provides 5-10 keywords that reflect the main	
12	content of the study. The first letter of each keyword is capitalized,	[Y]
	and each keyword is separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The	
	name of the first author should be typed in bold letters; the family	
	(sur) name of all authors should be typed with the first letter	
	capitalized, followed by their abbreviated first and middle initials.	
13	For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick	[Y]
	Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,	
	Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	
	mellitus increases the risk of gastric cancer: A meta-analysis. World J	
	Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the	
14	study that outlines the most innovative and important arguments	D/I
14	and core contents of the paper and will serve to effectively attract	[Y]
	readers.	
	The 'INTRODUCTION' section clearly describes the relevant	
	background information for the study. Only the most relevant and	
15	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	[Y]
	with the full name of abbreviations given upon first appearance in	
	the text and the abbreviation presented in parentheses [i.e.,	
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	1	L

	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately	
	describes all materials and methods used to obtain the data	
16	presented in the article and is adequate for a reader to repeat the	[N]
	study.	
	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have	
	scientific significance are emphasized. Data is presented in either	
17	the text, a table or figure (<i>i.e.</i> , chart, diagram, graph or image), but is	[N]
	not repeated among each. Information presented in the tables and	
	figures clearly describes the trends, meaning, and inferences.	
	Results described in textual form are accurate, concise and clear.	
	Statistical symbols are accurate. Statistical significance is expressed	
	as ${}^{a}P < 0.05$, ${}^{b}P < 0.01$ ($P > 0.05$ usually does not need to be denoted).	
18	If there are other series of <i>P</i> values, ${}^{c}P < 0.05$ and ${}^{d}P < 0.01$ are used,	[N]
	and a third series of <i>P</i> values is expressed as ${}^{e}P < 0.05$ and ${}^{f}P < 0.01$.	
	Statistical data is expressed as mean \pm SD or mean \pm SE.	
	1	

19The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.[M]20The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.[M]21The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.[M]22The 'ARTICLE HIGHLIGHTS' section in the text, a superscript number should be placed following the name (<i>i.e.</i> , "Pang et al"). For citations where ne author's name is indicated in the text, a superscript number should be placed following the name (<i>i.e.</i> , "Pang et al"). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma ^[1] reported", "Pan et al ^[0,5] . "The style of reference unuber is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text (<i>e.g.</i> , Pan et al ^[0,5] , please see reference [8]).		-	
 (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings. The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i>, providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i>, useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work. The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format. The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name (<i>i.e.</i>, "Pag et al"). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma^[1] reported,", "Pan et al^[2] indicated"; "PCR has a high sensitivity^[6,9]." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text 		The 'DISCUSSION' section (1) describes the main purpose and	
19the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.[M]20The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.[N]21The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.[N]21The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name (<i>i.e.</i> , "Pang <i>et al</i> "). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma ^[1] reported", "Pan <i>et al</i> ^[2,5] indicated"; "PCR has a high sensitivity ^[6,9] ." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text		hypothesis of the study; (2) summarizes the most important results;	
19 (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings. [M] 20 The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work. [N] 21 The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format. [N] 22 The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name (<i>i.e.</i> , "Pang et al"). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma ¹¹] [M] 22 be placed at the end of the sentence. Respective examples are: "Ma ¹¹] [M] reported", "Pan et al ^{12,5}] indicated"; "PCR has a high sensitivity ^{[69],"} No superscript numbers are used when the reference number is described in the text, for example, "The experimental method used has been described in reference [8]," The style of reference citations in tables is the same as that in the text		(3) illustrates and explains the results (but does not simply repeat	D.d.
(4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings. 20 The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.
