## CERTIFICATE

This is to certify that the invited manuscript entitled "*The growing importance of urogenital candidiasis in individuals with diabetes: a narrative review*" by Jasminka Talapko, Tomislav Meštrović and Ivana Škrlec has been proofread and edited by Associate Professor Tomislav Meštrović MD, PhD, MSPH, one of the co-authors on the paper.

My proficiency in English is a result of my educational background and experience. I have obtained my MSc Public Health (MSPH) degree at the London School of Hygiene & Tropical Medicine (University of London) in 2018, and finished 1-year training in clinical trials at Harvard Medical School in 2019, both with distinction. Currently I work as a Fulbright visiting scholar at the University of Washington Medical School.

Furthermore, I presently serve in different committees of many expert societies, with notable examples being the American Society for Microbiology (ASM), Society for Healthcare Epidemiology of America (SHEA) and College of American Pathologists (CAP). I have published numerous research and review papers in English.
