### **SPECIFIC COMMENTS TO AUTHORS**

In this article, it compared the pathological features of GSRC with those of gastric adenocarcinoma of different degrees of differentiation and the differences in survival prognosis between the different disease processes. The conclusion is clear: the prognosis of SRC should be accurately analyzed according to stage adjustment. SRC patients can benefit from early detection, surgical resection, and aggressive adjuvant therapy. 1. This study is innovative. 2. The research design is reasonable and rigorous, with clear ideas and clear conclusions. 3. With the help of language editing, the language expression of the paper is good. 4. The description of the conclusion is slightly redundant.

### **SPECIFIC COMMENTS TO AUTHORS**

Dear Author(s), The article comes from surgery department. Main issue to discuss should be D1, D2 dissection and effects on survival. Radiotherapy does not work (CLASSIC, ARTIST II trials) and should be in discussion section. Why 5 year survival is  
Article design quality and context of text is weak.

### **SPECIFIC COMMENTS TO AUTHORS**

When I was invited for manuscript title Clinicopathological Characteristics and Prognosis of Gastric Signet Ring Cell Carcinoma review, I liked it because gastric cancer is my specialty. But in this case the authors don't show us news, just more of the same and the obvious.
