SPECIFIC COMMENTS TO AUTHORS

This letter to the editor is addressed to present a brief review of the study of X et al. titled "Impact of the utilization of hepatitis C positive organs in liver transplant: Analysis of united network for organ sharing database," published in WJH, and to present the authors' views on this subject. 1. Authors should not use the same sentences in both the abstract and the text, so they should avoid frequent repetitions throughout the writing. 2. Although a summary of the data from the relevant study has been presented, the conclusions and forward-looking suggestions should be expressed more precisely and clearly. In other words, it would be appropriate for the authors to express more clearly their suggestions, which will arouse the reader's curiosity about which potential innovations should be addressed in the future based on the study mentioned above.

SPECIFIC COMMENTS TO AUTHORS

This Letter to the Editor is based on the article that is published in World Journal of Hepatology, entitled "Impact of utilization of hepatitis C positive organs in liver transplant: Analysis of united network for organ sharing database" in 2022 . The abstract summarizes and reflects the work described. The style, language, and grammar are appropriate. This letter is professionally written and will bring new insight to this field. I would like to recommend this letter for publication in present form.
