SPECIFIC COMMENTS TO AUTHORS

I read with interest a case report that includes multiple expert comments and gives a flavor of discussion by various specialty experts. This is indeed good care with decent outcomes. I have some comments 1. Figure 1b, patient's face showing just to allude nasal high flow oxygen, is not necessary. Delete figure 1b 2. Table 1 has contents in Chinese, get this translated to the English language, please.

SPECIFIC COMMENTS TO AUTHORS

The manuscript explained a case of severe pneumonia complicated by acute intra-abdominal multiple arterial thrombosis and bacterial embolism by Klebsiella pneumoniae. This case report is written in a good manner. However, there are some aspects that need to be resolved or clarified before considering this manuscript for publication. - Write gram-negative as Gram-negative in all manuscript. Also, correct the HVKP to hvKp and KP to Kp. - Write the name of prescribed antibiotic in the abstract. - How the author checked and evaluated that the patient had normal immune function? - Add the company name and countries for material used in this study including biochemical, immunological, and microbiology kits. - Why the linezolid and vancomycin are prescribed as the Gram-negative bacteria are resistant to these antibiotics? - The Table 1 can be deleted as n information adds to manuscript. Also, it is in Chinese language. - The references are to old to use. Replace all references before 2018 with new recent references. I recommend to use the following references in introduction and discussion to strength your manuscript: - <https://doi.org/10.1016/j.genrep.2021.101128> - <https://doi.org/10.2174/1871526520999200905121220> - <https://doi.org/10.1016/j.heliyon.2019.e02349>
