	Science Editor: Remind Revision at 2022-08-20 08:18	
	Company Editor-in-Chief: I recommend the manuscript to be	
	published in the World Journal of Clinical Cases. Before final	
	acceptance, when revising the manuscript, the author must	
	supplement and improve the highlights of the latest cutting-edge	
	research results, thereby further improving the content of the	
	manuscript. To this end, authors are advised to apply a new tool,	
	the Reference Citation Analysis (RCA). RCA is an artificial	
	intelligence technology-based open multidisciplinary citation	
	analysis database. In it, upon obtaining search results from the	
	keywords entered by the author, "Impact Index Per Article" under	
	"Ranked by" should be selected to find the latest highlight articles,	
	which can then be used to further improve an article under	
	preparation/peer-review/revision. Please visit our RCA database	
	for more information at:	
	https://www.referencecitationanalysis.com/.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	[Y]
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first	[Y]
6	names are listed on the title page and are consistent with those	
	listed in the signed BPG Copyright License Agreement form.	

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com https://www.wjgnet.com

	The 'Author contributions' passage describes the specific	[Y]
	contribution(s) made by each author. The author's names are listed	. 1
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
7	e.g., "Wang CL and Liang L contributed equally to this work; Wang	
7	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	
	research study; Wang CL, Zou CC, Hong F and Wu XM performed	
	the research; Xue JZ and Lu JR contributed new reagents and	
	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and	
	Wang CL, Liang L and Fu JF wrote the manuscript. All authors	
	have read and approve the final manuscript."	
	The 'Supported by' statement describes the source(s) of financial	
8	support and includes the corresponding identification number(s)	[N]
	and program ID(s) if available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding	[Y]
	author's full first and family (sur)names, abbreviated title (e.g., MD,	
9	PhD), affiliated institute's name and complete postal address	
	(including zip code) and e-mail (written in all lowercase), and	
	contains no spelling errors.	
	The Manuscript Tracking information (i.e., Received, Peer review	[Y]
10	started, First decision, Revised, Accepted, Article in press, and	
10	Published online) are provided along with the corresponding editor	
	and date for each item, and contain no spelling errors.	
	The Abstract section is formatted according to the article-specific	[Y]
	style (structured vs unstructured) and word count thresholds, as	
	follows:	
11	Commentary, Frontier, Diagnostic Advances, Medical Ethics,	
	Minireview, Review, Therapeutics Advances, and Topic Highlight:	
	Non-structured abstract that is no less than 200 words.	
	Field of Vision, Case Report and Letter to the Editor:

	Non-structured abstract that is no less than 150 words.	
	Research articles: Structured abstract with subsections for AIM (no	
	more than 20 words); METHODS (no less than 80 words); RESULTS	
	(no less than 120 words); and CONCLUSION (no more than 26	
	words).	
	The 'Key words' list provides 5-10 keywords that reflect the main	[Y]
12	content of the study. The first letter of each keyword is capitalized,	
	and each keyword is separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The	[Y]
	name of the first author should be typed in bold letters; the family	
	(sur) name of all authors should be typed with the first letter	
	capitalized, followed by their abbreviated first and middle initials.	
13	For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick	
	Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,	
	Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	
	mellitus increases the risk of gastric cancer: A meta-analysis. World J	
	Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the	[Y]
14	study that outlines the most innovative and important arguments	
14	and core contents of the paper and will serve to effectively attract	
	readers.	
15	The 'INTRODUCTION' section clearly describes the relevant	[Y]
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
	with the full name of abbreviations given upon first appearance in	
	the text and the abbreviation presented in parentheses [i.e.,	
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed

	by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully.	
16	The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.	[Y]
17	The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure (<i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.	[Y]
18	Statistical symbols are accurate. Statistical significance is expressed as ${}^{a}P < 0.05$, ${}^{b}P < 0.01$ ($P > 0.05$ usually does not need to be denoted). If there are other series of P values, ${}^{c}P < 0.05$ and ${}^{d}P < 0.01$ are used, and a third series of P values is expressed as ${}^{c}P < 0.05$ and ${}^{f}P < 0.01$. Statistical data is expressed as mean \pm SD or mean \pm SE.	[Y]

hypothesis of the study; (2) summarizes the most important results;	
(3) illustrates and explains the results (but does not simply repeat	
the data) and draws conclusions or inferences based on the results;	
(4) points out the limitations of the study and their impact on the	
results, as well as proposes further advice on future research	
topic(s) or direction(s); and (5) describes the theoretical significance	
and practical value of the findings.	
The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	N]
individuals or organizations for technical support (i.e., providing	
instrumentation, equipment or experimental materials, and/or	
assistance in experimental work), non-technical services (i.e., useful	
inspiration, suggestions, guidance, or review), and/or any other	
auxiliary work.	
The 'ARTICLE HIGHLIGHTS' section provides comments for [1]	Y]
original articles in accordance with the specified format.	
The 'REFERENCES' section lists the references in the Vancouver	Y]
style. This style uses Arabic numeral in-text citations based on the	
order of the first appearance of a source in the text. For citations	
where the author's name is indicated in the text, a superscript	
number should be placed following the name (i.e., "Pang et al"). For	
citations where no author is indicated, a superscript number should	
be placed at the end of the sentence. Respective examples are: "Ma[1]	
reported", "Pan et al ^[2-5] indicated"; "PCR has a high	
sensitivity ^[6,9] ." No superscript numbers are used when the	
reference number is described in the text; for example, "The	
experimental method used has been described in reference [8]." The	
style of reference citations in tables is the same as that in the text	
(e.g., Pan et al ^[2-5] , please see reference [8]).

Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version. The number of cited references is appropriate for the article type, as follows: Commentary: no less than 50; Review: no less than 100; Article: no less than 30/26; Case Report and Letter to the Editor; no less than 1. The ethics-related statements are provided in accordance with the manuscript type (e.g., Manuscript NoInstitutional review board statement, Manuscript NoAnimal care and use statement, etc.). The names of the peer reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL). The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, ×, *, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A:; B:; C:; D:; F:	duplicate references and that the PMID numbers are correct.
