

Dear Editors,

Thanks very much for taking your time to review this manuscript. I really appreciate all your comments and suggestions! Please find my itemized responses in below and my revisions/corrections in the re-submitted files.

Reviewer #1:

**Scientific Quality:** Grade C (Good)

**Language Quality:** Grade C (A great deal of language polishing)

**Conclusion:** Major revision

**Specific Comments to Authors:** Abstract needs to be restructured for language clarity. Introduction need to present the proportion of Aggressive VH in VH. The entire manuscript needs a lot of language polishing before considering for publication.

Answer: 1. We polished all the manuscript and provided the certification.

2. We added the proportion of aggressive VH in VH in the introduction part.

Reviewer #2:

**Scientific Quality:** Grade B (Very good)

**Language Quality:** Grade B (Minor language polishing)

**Conclusion:** Minor revision

**Specific Comments to Authors:** Overall, this case presented by the authors is regarding sacral vertebral hemangiomas with interesting atypical radiographic appearances and recurrence after 6 month status-post operation. It is well written and has utility to serve the general medical audience and radiology community. The following of potential minor revision for consideration: In the History of Present Illness, the authors reports no past medical history. While this serves the point, it may be to the readers best interest if this can be further expanded upon while remaining concise. For example, explicitly state the medication history, family history, previous surgical history (none, but please state it as well). Please expand the physical examination. Pertinent MSK was included, but it may be to the readers best interest if the exam is elaborated with the comprehensive MSK, if performed. Grammatical spacing required in Line 127: "VHs.The".....add space between period and "The". Discussion is well written and concise to the focus of the manuscript.

Answer:

1. We added some information about history of present illness.

2. We expanded the physical examination.

3. We added expanded the imaging findings.

4. We polished the manuscript and provided the certification.

Best regards

Gao chuanping
