

Dear reviewers:

Thank you very much for your comments and professional advice. These opinions help to improve academic rigor of our article. Based on your suggestion, we have made corrected modifications on the revised manuscript. Furthermore, we would like to show the details as follow:

Reviewer #1:

Scientific Quality: Grade C (Good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Minor revision

Specific Comments to Authors: This is an interesting study of the prostate artery embolization on lower urinary tract symptoms related to benign prostatic hyperplasia. In this study, the authors performed a meta-analysis to evaluate the efficacy and safety of prostate artery embolization compared with transurethral resection of the prostate, which may help urologists make better choices. The study is well designed and the manuscript is well written. The manuscript requires a minor editing.

The authors' answer: Thank you very much for your professional advice. Based on your suggestion, we have made corrected modifications on the revised manuscript. Meanwhile, the manuscript had been reviewed and

edited by language services of American Journal Experts. We hope that our work can be improved again.

Reviewer #2:

Scientific Quality: Grade C (Good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Minor revision

Specific Comments to Authors: 1. Inclusion and exclusion criteria section should be revised, now it is a listing of numbered criteria. 2. References in results section are noted like: (Insausti2020, (Gu2018 and Insausti2020), and (Carnevale2016). This is not in line with the rest of the review. 3. My advice is to adjust sentence structure of the first line of each result section (lines 80-86, 96-103, 113-119, 130-137, 148-151, 163-166, 177-180 and add correct citations to these studies mentioned.

The authors' answer: Thank you very much for your professional advice. We have revised the inclusion and exclusion criteria section to make the presentation clearer. We have adjusted sentence structure of the first line of each result section and have added correct citations to these studies mentioned. Meanwhile, the manuscript had been reviewed and edited by language services of American Journal Experts.

Thank you very much for your attention and time. Look forward to hearing from you.

Sincerely,

Yong Zhang
