SPECIFIC COMMENTS TO AUTHORS

The authors have presented a case of BPPV in a patient with pre-existing congenital nystagmus. Though BPPV is a common cause of vertigo, recognition of this condition in the presence of congenital nystagmus can be challenging. The authors have explained the nystagmus present in different oculomotor and positional tests. They have also explained the importance of ruling out other central vestibular disorders from the congenital nystagmus. This is a case presentation of a relatively rare condition presented to make the reader aware of the condition and the way to diagnose and treat it. Limitations - grammatical corrections are required which is understandable as the authors are not native English speakers. An edited version of the manuscript has been uploaded to help the authors. The figures described in the text have not been uploaded which is essential to review the findings.

SPECIFIC COMMENTS TO AUTHORS

Dear authors: Benign Position Paroxysmal Vertigo with Congenital Nystagmus, could be an interesting case to report, as you alluded in this article. It is worth noting that, the discussion section is rich and well arranged, and the most parts of the manuscript has a good spelling, grammar and syntax. However, before it becomes publishable, it still requires some improvement. Here are my comments: 1.The introduction is very short. The constructs and concepts in the introduction section are poor-organized and incomplete. Include more general and specific background in this section. 2.The discussion section has been written appropriately, but for making it more valuable, consider precise comparison between other and your case about similarity and differences. 3.There are some grammatical errors, and the manuscript should be rechecked for punctuation. Example: "The vertigo lasting less than 1 minute occurs when turning over sometime accompanied by nausea and vomiting". The correct sentence is: (The vertigo lasting less than 1 minute occurs when turning over, sometime accompanied by nausea and vomiting). Case Summary section, Line 2. 4.In the introduction and discussion section, there are some sentences which been left without citation. Provide references for All the sentences which finished by dot, and make sure that the entire of manuscript follow this maxim. 5.Most bibliographic citations which been used are more than 5 years old and obsolete. The authors must update and arrange the bibliography.
