SPECIFIC COMMENTS TO AUTHORS

3 cases of turbinate mucoceles were presented. Though such cases are rare and they are of interest to clinicians. The cases are well presented with relevant details and use of images. The discussion is comprehensive and covered all aspects of the cases.

SPECIFIC COMMENTS TO AUTHORS

Although clinical diagnosis favors mucocele and pyogenic mucocele but histopathological diagnosis followed by immunohistochemical analysis is recommended to rule out spectrum of sino-nasal tumors of head and neck region. Also, there should be elaborate discussion on on literature review on this entity with differential diagnosis to understand biological behaviour and prognosis of such lesions.

SPECIFIC COMMENTS TO AUTHORS

A concise, comprehensive, easy to read and well structured case report. I suggest to check the English consistency of the manuscript. There are some spelling errors throughout the text. I think this paper is welcome and relevant for medical daily practice. Thank You.
