#### **SPECIFIC COMMENTS TO AUTHORS**

The author investigate and show coexistence of ALK rearrangement in lung adenocarcinoma harbouring EGFR mutation. The study is so interesting, however, I have some concerns to be discussed. - Is there any regional specificity in the Gannan region? If so, what is the impact on lung cancer? -Is radiation effective? Please cite and discuss the following references Lung Adenocarcinoma Presenting as a Soft Tissue Metastasis to the Shoulder: A Case Report. Medicina (Kaunas). 2021;57(2):181. Published 2021 Feb 20. doi:10.3390/medicina57020181 - Are there any image characteristics? - Is the treatment the same as for negative lung cancer? - How are the results of this study clinically effective or useful?
