

PEER-REVIEW REPORT

Name of journal: *World Journal of Diabetes*

Manuscript NO: 79252

Title: Postprandial glucagon-like peptide 1 secretion is associated with urinary albumin excretion in newly diagnosed type 2 diabetes patients

Provenance and peer review: Unsolicited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 06403211

Position: Peer Reviewer

Academic degree: MD

Professional title: Doctor

Reviewer's Country/Territory: Malaysia

Author's Country/Territory: China

Manuscript submission date: 2022-10-27

Reviewer chosen by: AI Technique

Reviewer accepted review: 2022-10-27 04:47

Reviewer performed review: 2022-11-14 09:30

Review time: 18 Days and 4 Hours

SPECIFIC COMMENTS TO AUTHORS

This is a novel research project that has direct clinical relevance. A MAU with a variety of risk factors, such as blood pressure, diabetes, and metabolic syndrome, as well as subclinical organ damage. As shown in Table 1, microalbumina patients also have high blood pressure (hypertension). In fact, albuminuria has traditionally been regarded as a sign of hypertensive renal damage as well. An earlier study showed that the pharmacological administration of GLP-1R (glucagon-like peptide-1 receptor) agonists reduced blood pressure (BP) in type 2 diabetes. Can this study determine the correlation between hypertension and GLP-1 levels? If possible, the authors may also discuss the role of GLP-1P-1 in cardiovascular protection in diabetic patients.

SPECIFIC COMMENTS TO AUTHORS

I applaud the author for taking on the study of clinical importance. The author in the method section should address the study design and mention about the IRB approval and mention those details.
