SPECIFIC COMMENTS TO AUTHORS

Comments to authors on the manuscript: **DIABETIC FOOT ULCERS:
CLASSIFICATION, RISK FACTORS, AND MANAGEMENT** The manuscript is written according to rigorous scientific standards. However, the theme of the manuscript gave major importance to the damage caused by T2D on the feet of patients who did not know or could not respect the steps to take in order to avoid an ulceration of one or two feet at the same time.

SPECIFIC COMMENTS TO AUTHORS

Wang et al. reviews the classifications, the risk factors, and management of DFU. The paper is well organized and of interest in general and area-specific (diabetology, surgery, prevention) clinical practice. Some issues need to be corrected regarding improvement of paper quality and then to obtain necessary qualification for publishing. The chapters complications of diabetes and obesity are excessive and not necessary. Additionally, Ch about patients' quality of life before and after application of different treatment modalities is extremely important. So, please, put several sentences about that. Minor English polishing is necessary.
