#### **SPECIFIC COMMENTS TO AUTHORS**

Thanks to the authors for the original and very interesting manuscript. This genetic disorder is very rare and the manuscript is presenting novel treatment approach. The authors have provided very informative and illustrative images. Overall it is very well structured, but for the reader probably it will be easier to understand if the cases are presented separately. The references should be presented with proper coding system according to the Format for References Guidelines. Page 4 row 11- the verb "is" is missing after "it" and before "spontaneously".
