SPECIFIC COMMENTS TO AUTHORS

Authors showed a case with ACV successfully treated by TCM, Danggui Sini Decoction. In present case, a patient refractory with steroid or anti-allergic therapy could be improved by the TCM. It was an interesting case. But ACM diagnosis or pathogenesis were unclear. The pathological findings of present case should be shown. The presence of any infection should be described.

SPECIFIC COMMENTS TO AUTHORS

Interesting manuscript, which can put forward traditional medicine methods in the era of modern medicine. However, should this treatment be used in different forms for each of its components? Subsequently, can it be made in the form of a combination such as a topical drug in the future?
