Thank for notification for revision. Revision is done according to all comments. Revision is in red/tracked. Point by point response is given below

Scientific Quality: Grade B (Very good)
Language Quality: Grade B (Minor language polishing)
Conclusion: Accept (General priority)

Your letter highlighted the possible reasons for the observation published in the mentioned paper, which need to be taken into consideration in the interpretation and also future research. The manuscript require some corrections on grammatical and construct of the sentence for an easier read. Thank you

Scientific Quality: Grade C (Good)
Language Quality: Grade B (Minor language polishing)
Conclusion: Minor revision

Reply: English editing is done.

Scientific Quality: Grade B (Very good)
Language Quality: Grade A (Priority publishing)
Conclusion: Accept (High priority)

This is an interesting study. At present, the pathogenesis of Kawasaki disease is still unknown, especially the high risk factors of Kawasaki disease complicated with coronary artery injury. Whether abnormal lipid metabolism exists in children with Kawasaki disease and its role in the occurrence and development of Kawasaki disease are one of the hot spots in current research. This study has certain clinical value in finding possible biomarkers of Kawasaki disease from the perspective of lipid metabolism.
