## Editorial Office's Comments

Science Editor: Remind Revision at 2022-10-29 08:18

Company Editor-in-Chief: I have reviewed the Peer-Review Report, full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Critical Care Medicine, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor. In order to respect and protect the author's intellectual property rights and prevent others from misappropriating figures without the author's authorization or abusing figures without indicating the source, we will indicate the author's copyright for figures originally generated by the author, and if the author has used a figure published elsewhere or that is copyrighted, the author needs to be authorized by the previous publisher or the copyright holder and/or indicate the reference source and copyrights. Please check and confirm whether the figures are original (i.e. generated de novo by the author(s) for this paper). If the picture is 'original', the author needs to add the following copyright information to the bottom right-hand side of the picture in PowerPoint (PPT): Copyright ©The Author(s) 2022.

	The 'INTRODUCTION' section clearly describes the relevant		
	background information for the study. Only the most relevant and		
	current (within the past 5 years) literature is cited, with the		
	exception of rare instances of seminal literature citations. All		
	technical terms and/or abbreviations are explained and/or defined,		
45	with the full name of abbreviations given upon first appearance in	F2/3	
15	the text and the abbreviation presented in parentheses [i.e.,	[Y]	
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',		
	'we') are used appropriately to clearly indicate the work performed		
	by the author(s). When weaknesses of previous studies are		
	described in the text to highlight the innovations related to the		
	current study, the information is presented carefully.		
	The 'MATERIALS AND METHODS' section clearly and accurately	[Y]	
	describes all materials and methods used to obtain the data		
16	presented in the article and is adequate for a reader to repeat the		
	study.		
	The 'RESULTS' section concisely describes the observational and		
	experimental results. Representative data and data that have		
	scientific significance are emphasized. Data is presented in either		
17	the text, a table or figure (i.e., chart, diagram, graph or image), but is	[Y]	
	not repeated among each. Information presented in the tables and		
	figures clearly describes the trends, meaning, and inferences.		
	Results described in textual form are accurate, concise and clear.		
	Statistical symbols are accurate. Statistical significance is expressed		
	as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted).		
18	If there are other series of $P$ values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	[Y]	
	and a third series of $P$ values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.		
	Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.

19	The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.	[Y]
20	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support ( <i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services ( <i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.	[N]
21	The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.	[Y]
22	The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name ( <i>i.e.</i> , "Pang <i>et al</i> "). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup> reported", "Pan <i>et al</i> <sup>[2-5]</sup> indicated"; "PCR has a high sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text ( <i>e.g.</i> , Pan <i>et al</i> <sup>[2-5]</sup> , please see reference [8]).	[Y]
