SPECIFIC COMMENTS TO AUTHORS

It was pleasure to read the manuscript entitled, "Liver Transplantation Amidst the COVID-19 Era; Our Centre Experience". Though the manuscript is of scientific importance, there are several problem with the manuscript (listed below) 1. Abstract need to be re-written. Sentences seems unconnected. Author must stated what is the benefits, if this work is published 2.In figure 1, what is the y axis 3. Entire manuscript must be proof read by the professional language editing services or native speakers prior to publication because several places there is no connection between the sentences and punctuation problems in almost every paragraph. 4. Like Abstract, conclusion also need to be concise and also must state few sentences about the limitation and future perspectives of the study
