SPECIFIC COMMENTS TO AUTHORS

Thanks for the opportunity to review the REVIEW entitled "Screening and interventions prevent NAFLD/NASH-associated hepatocellular carcinoma". comprehensively concluded an overview of evidence related to lifestyle changes (i.e. weight loss, physical exercise, adherence to healthy dietary patterns, intake of certain dietary components, etc.) and pharmacological interventions that might play a protective role by targeting the underlying causative factors and pathogenetic mechanisms. This is a well-written review with a clear message. It deserves to be published.

SPECIFIC COMMENTS TO AUTHORS

In this manuscript the authors report Screening and interventions to prevent NAFLD/NASH-associated hepatocellular carcinoma The title reflects the main subject of the manuscript. The Introduction is well resourced and the subject is presented very well. The abstract summarizes and reflects the work described in the manuscript. The abstract is compatible with the main text. The keywords reflect the focus of the manuscript. The authors should add histological figures illustrating the complications of celiac disease The references are up-to-date. This manuscript is well-balanced. The style, language and grammar require minor revision This manuscript does not add anything new to the medical literature
