SPECIFIC COMMENTS TO AUTHORS

i congratulate the authors on writing on this very interesting topic which is very controversial . The authors have covered the major aspect of the topic but still they have failed to conclude any clear message. Also , few of these studies quoted in the manuscript have shown invalid results that's further increases the controversy. I have noted few short comings in the main manuscript file, and the authors are requested to correct them. Secondly , the outcome of HCC not only affected by microvascular invasion but other factors like tumors markers , size , and grading. I will advise the authors to comment on this in their manuscript. These parameters should be mentioned in tables.

SPECIFIC COMMENTS TO AUTHORS

It would be good to arrange the article in a systematic manner, like how many articles collected, key words used etc or else arrange it as critically analyzed. One figure can be included. the article looks interesting, but monotonous in flow of science. table legends need clarity .

SPECIFIC COMMENTS TO AUTHORS

I will congratulate the authors for significantly improving the quality of the manuscript. still further minor correction is needed. I have marked few sentences of the manuscript which needs references.
