SPECIFIC COMMENTS TO AUTHORS

Dear Editorial team. I think this report, contains useful information, especially for pediatricians and general practitioners who should dedicate more attention to patients and pay more attention to such situation that seems not important but could threaten patients life.

SPECIFIC COMMENTS TO AUTHORS

It is very important to report and summarize the cases of duodenal perforation in children. Overall, this paper is well written. 1.However, the writing of the history part of the case was not standardized. 2.The erect and supine radiographs in Figure1 should be marked separately. 3.An X-ray showing the location of the abdominal drainage tube should be added if available
