**To whom it may concern**

Geneva, December 13<sup>th</sup> 2012

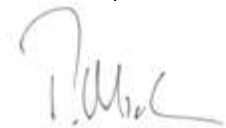

**Concern: Certification of high quality of the English language in the article Wig/2012/0031037, entitled « Alpha-fetoprotein: a controversial prognostic biomarker for small hepatocellular carcinoma ».**

Dear Madame/Sir,

This is to certify that English language in the article entitled “Alpha-fetoprotein: a controversial prognostic biomarker for small hepatocellular carcinoma” by Drs. Asrih, Lenglet, Montecucco and myself submitted to the World Journal of Gastroenterology is of high quality (degree B).

Do not hesitate to contact me if you need any further information regarding this project.

Sincerely,

Professor François Mach  
Head of Cardiology  
Geneva University Hospital
