SPECIFIC COMMENTS TO AUTHORS

In this study, the authors studied the optimal approach of total endoscopic discectomy and its influence on lumbar and leg pain and lumbar function in patients with disc herniation. The study is well designed and the results are interesting. The aim of the study is clear and the methods are clearly described. Manuscript required a minor editing. 1. Some minor language polishing should be corrected. 2. A short discuss about the limit of the study should be added. 3. The references should be updated.
