To whom it may concern,

This letter is to confirm that statistical methods of the study entitled: **“Does size matter for hepatic resection of giant ( $\geq 10$  cm) versus non-giant ( $< 10$  cm) hepatocellular carcinoma? A meta-analysis”** (manuscript ID: 80745) were reviewed by Dr. Chan Yiong Huak from the National University Health System Research Support Unit and Dr. Vishal G Shelat.
