PEER-REVIEW REPORT

Name of journal: World Journal of Orthopedics

Manuscript NO: 80791

Title: Two-stage Revision in Periprosthetic Knee Joint Infections

Provenance and peer review: Invited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 06402278

Position: Peer Reviewer

Academic degree: MD

Professional title: Doctor

Reviewer's Country/Territory: Italy

Author's Country/Territory: Saudi Arabia

Manuscript submission date: 2022-10-12

Reviewer chosen by: AI Technique

Reviewer accepted review: 2022-10-27 12:54

Reviewer performed review: 2022-11-07 09:05

Review time: 10 Days and 20 Hours

SPECIFIC COMMENTS TO AUTHORS

Dear authors, thank you for the effort in describing in details the two-stage revision process. PJI is an important topic and more research about the subject is needed. I have really liked the clear exposition of the problem and how you have divided the different steps, the only problem is that this study doesn't add any new data or finding to the current body of evidence on PJI's treatment.

SPECIFIC COMMENTS TO AUTHORS

General comments: The study aims to highlight the recent advances in managing PJIs following knee arthroplasty surgery and discuss in depth the two-stage revision method. The document reviewing the treatment of periprosthetic joint infection in the knee demonstrates a good level of expertise of the authors in this field as well as a good scientific level. The article is well written and easy to read. No spelling errors are found in the article and authors had into account the guidelines of the journal. For this reason, I understand that it is ready for publication, due to its interest and scientific quality. Therefore, I would like to congratulate the authors.
