#### **SPECIFIC COMMENTS TO AUTHORS**

Authors showed a case of TMA induced by glucocorticoid treatment. The patient had aplastic anemia and PNH. Those complication made the diagnosis difficult. The patient was successfully treated. The careful observation was useful for the diagnosis and treatment. This case report was informative and useful for clinicians.

#### **SPECIFIC COMMENTS TO AUTHORS**

Extensive language editing is must. Microangiopathy has not been proved. The number of relevant references can be reduced to less than 15. Incidental suppression of thrombopoiesis in response to very high dose of steroid can't be a causal but needs proper literature review and large observation. The text burden is high in the abstract, introduction and discussion.
