

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 81471

Title: Transient ischemic attack induced by pulmonary arteriovenous fistula in a child:
a case report

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 00252651

Position: Editorial Board

Academic degree: FACC, FACP, MD

Professional title: Academic Research, Associate Professor, Attending Doctor, Chief
Doctor, Lecturer, Research Scientist

Reviewer's Country/Territory: United States

Author's Country/Territory: China

Manuscript submission date: 2022-11-12

Reviewer chosen by: Dong-Mei Wang

Reviewer accepted review: 2022-12-26 17:00

Reviewer performed review: 2022-12-26 17:16

Review time: 1 Hour

SPECIFIC COMMENTS TO AUTHORS

Please review spelling, punctuation and grammar, as there are a lot of grammatical mistakes that are very distracting to the reader. Did you do a bubble study? Do you have pictures/videos you can provide to show late filling?

SPECIFIC COMMENTS TO AUTHORS

We have read with great interest and appreciate the hardwork from the authors, several input are following

1. Since TIA induced by pulmonary AVM is extremerly rare in occurence, we suggest the author to add the prevalence of this condition
2. Since its rarity in finding in general and pediatric population, we suggest the author to add available cardiac workup as the more common etiology of embolic source, such as contrast TTE/TEE to exclude septal defects or holter monitoring to screen paroxysmal AF
3. We suggest to add 6 months post intervention CT scan evaluation as standard procedure if available
