

1.

The language of the full article needs further polishing.

: I totally agree that it should need further polishing. I try to polish more again. Thank you.

2.

Discussion- part 2-line7-8, It is recommended to modify the description of the MRI signal in the lesion: I suggested changing "T1 iso or hypointense and central T2 poorly delineated hyperintense signal in spinal cord lesion " into "iso or hypointense on T1 weighted imaging(T1WI) and poorly delineated hyperintense signal on T2WI in the central of spinal cord lesion".

: The content has been modified to reflect the reviewer's corrections. thank you.
