The article is interesting for the readers, because it includes a new classification for the subject. but it had been written in a bad way. it need a major revision. The highlighted phrases and sentences in the uploaded file are just examples. But the article is in need for great revision, examples: 1. the title is vague and not appropriate, may be "New classification for the purulent infections of the hand" is an option. 2. alot of sentences are not clear and not understandable. they need great revision both scientifically and grammarly. 3. the 5th reference need to be revised properly. 4. The figures legends are in need for revision. example: "2 finger" to be replaced by "index or second finger"
