SPECIFIC COMMENTS TO AUTHORS

The paper is well-organized and many related factors have been considered. However, there is only one major issue as follows: In section 1. SARS-CoV-2, the virus has been described very well and in section 1.1 Infection mechanism of SARS-CoV-2, the infection mechanism has been mentioned. However, it seems that another part should be added as follows: 1.2 Factors contributed to the severity of SARS-CoV-2 infection Recent studies are well-documented that several factors like the level of physical activity and the quality of diet have profound effects on the disease severity. Also, the COVID-19 disease may have caused an increase in new-onset of type 1 diabetes in children and also may have caused several cardiac dysfunctions in post-COVID survivors. (you can refer to these papers: 10.1002/rmv.2349; 10.1002/jmv.28298; 10.1002/jmv.27996; 10.1002/jmv.28325).

SPECIFIC COMMENTS TO AUTHORS

Good work. I have two comments: 1. The authors should follow the journal style regarding the writing the references in the text and the references list. 2. The "Challenges and perspectives of IFN- λ " should be changed to "Conclusion"
