SPECIFIC COMMENTS TO AUTHORS

In the present, many case reports of autoimmune diseases following SARS CoV-2 vaccine, especially autoimmune hepatitis, have aroused great concern in the medical community. The reviews about the correlation between SARS CoV-2 vaccine, liver dysfunction, and autoimmune diseases have been published. This paper summarized the effects of autoimmune liver disease and SARS CoV-2 infection on the course and clinical outcome of both diseases; Secondly, the clinical features of autoimmune liver disease caused by SARS CoV-2 infection reported recently were summarized, and the possible mechanism of immune mediated liver damage caused by SARS CoV-2 infection was expounded. Finally, the demographic characteristics, clinical characteristics, therapeutic effects and prognosis of autoimmune liver disease induced by SARS CoV-2 vaccine were comprehensively summarized. The abstract reflect the work described in the manuscript. The manuscript is concisely and coherently organized and presented, and the references cited in this paper are novel. It is a suggestion: If the potential mechanism of autoimmune liver diseases induced by SARS-CoV-2 infection and vaccination might be demonstrated by schematic diagram.

SPECIFIC COMMENTS TO AUTHORS

Dear Authors, The manuscript "Autoimmune liver diseases and SARS-CoV-2" is concise, clear, comprehensive and interesting for readers of the WJG. It describes a very current topic in an adequate way and fulfills all the requirements to be published. Congratulations. I have only one suggestion. In the AILDs following SARS-CoV-2 vaccines section, there is a web address(<https://ourworldindata.org/covid-vaccinations>), which I think should be in the bibliography. Best regards,
