SPECIFIC COMMENTS TO AUTHORS

In this manuscript, the authors present a minireview about update of diagnosis and management of duodenal lymphoma. The title is complete and informative however since this manuscript is a review I suggest adding this word to the title. The abstract is complete and informative. Introduction: This part is complete. I would only add some epidemiology like the cumulative incidence of duodenal lymphoma. The Discussion part is complete and informative. The topic is not novel, however, the review is interesting and contains up-to-date information. English review is needed for some errors in the text.
