### **SPECIFIC COMMENTS TO AUTHORS**

The interesting point of linking a higher level of nocturnal prolactin secretion in relation to the melatonin use is well addressed in the proposed manuscript as Letter to the editor. Limited recent data on the topic justifies the presented insights, researchers and clinicians would benefit from more in-depth analysis on this correlation.

## SPECIFIC COMMENTS TO AUTHORS

Thanks for recommending me as a reviewer. In this Letter to the Editor, authors were believe that since the effect of melatonin on prolactin is tangible, the laboratory finding of hyperprolactinemia could be encountered more often, given the increase in melatonin's use. This Letter to the Editor is well written.
