SPECIFIC COMMENTS TO AUTHORS

The authors have provided a detailed review of the management of gallbladder carcinoma, this is a clinically rare but important topic that requires early diagnosis and subsequent management. It would be imperative to perhaps tabulate the results from various studies including- the complication rate (perforation), metastases at the site etc. Tabulating the data comparing LC with standard procedure There is a lack of data analysis present-kindly expand this A historical perspective has been included, and further emphasis on clinical management would be needed.

SPECIFIC COMMENTS TO AUTHORS

Congratulations on your manuscript. It is a exhaustive review on the use of laparoscopy in gallbladder cancer. However, it mostly offers a historical perspective on this subject. It could benefit from a summary regarding current recommendations. For example - What do international guidelines endorse? Lastly, you mention robotic surgery and ERAS protocol; it doesn't relate directly to your review (not mentioned in your title) and I find that it worsens the overall quality of your manuscript.
