	General Information of the Manuscript	
	Name of journal: World Journal of Hepatology	
1	Manuscript NO.: 82468	
	Column: Case Report	
	Title: Cerebrospinal fluid liver pseudocyst: A bizarre long-term	D.d.
	complication of ventriculoperitoneal shunt: A case report	[Y]
	Authors: Muhammad Nadeem Yousaf, Haider A Naqvi, Shriya Kane,	
	Fizah S Chaudhary, Jason Hawksworth, Vikram V Nayar and Thomas	
	W Faust	
	<b>Reviewer code:</b> 05130811, 00057917, and 05130811	

7041 Koll Center Parkway, Suite 160, Pleasanton, CA 94566, USA **Telephone:** +1-925-399-1568

**E-mail:** bpgoffice@wjgnet.com

	First decision: 2023-02-21 23:01	
	Editorial Office's Comments	
	Science Editor:	
	The manuscript has been peer-reviewed, and it's ready for the first de	
	cision.	
	Company Editor-in-Chief: I have reviewed the Peer-Review Report	
	and the full text of the manuscript, all of which have met the basic	
	publishing requirements of the World Journal of Hepatology, and the	
	manuscript is conditionally accepted. I have sent the manuscript to the	
	author(s) for its revision according to the Peer-Review Report,	
	Editorial Office's comments and the Criteria for Manuscript Revision	
	by Authors. The quality of the English language of the manuscript	
2	does not meet the requirements of the journal. Before final acceptance,	[5/]
2	the author(s) must provide the English Language Certificate issued by	[Y]
	a professional English language editing company. Please visit the	
	following website for the professional English language editing	
	companies we recommend:	
	https://www.wjgnet.com/bpg/gerinfo/240. Before final	
	acceptance, when revising the manuscript, the author must	
	supplement and improve the highlights of the latest cutting-edge	
	research results, thereby further improving the content of the	
	manuscript. To this end, authors are advised to apply a new tool, the	
	Reference Citation Analysis (RCA). RCA is an artificial intelligence	
	technology-based open multidisciplinary citation analysis database. In	
	it, upon obtaining search results from the keywords entered by the	

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

		1
	author, "Impact Index Per Article" under "Ranked by" should be	
	selected to find the latest highlight articles, which can then be used to	
	further improve an article under preparation/peer-review/revision.	
	Please visit our RCA database for more information	
	at: https://www.referencecitationanalysis.com/. Uniform	
	presentation should be used for figures showing the same or similar	
	contents; for example, "Figure 1Pathological changes of atrophic	
	gastritis after treatment. A:; B:; C:; D:; E:; F:; G:". Please	
	provide decomposable Figures (in which all components are movable	
	and editable), organize them into a single PowerPoint file. Please	
	check and confirm whether the figures are original (i.e. generated de	
	novo by the author(s) for this paper). If the picture is 'original', the	
	author needs to add the following copyright information to the bottom	
	right-hand side of the picture in PowerPoint (PPT): Copyright ©The	
	Author(s) 2023.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is not	
	too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	[Y]
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first names	
6	are listed on the title page and are consistent with those listed in the	[Y]
	signed BPG Copyright License Agreement form.	
L		

**Telephone:** +1-925-399-1568 E-mail: bpgoffice@wjgnet.com

7	The 'Author contributions' passage describes the specific contribution(s) made by each author. The author's names are listed in the following format: full family (sur)name followed by abbreviated first and middles names.  e.g., "Wang CL and Liang L contributed equally to this work; Wang CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and	[Y]
8	approve the final manuscript."  The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors.	[N]
9	The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title ( <i>e.g.</i> , MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.	[Y]
10	The Manuscript Tracking information ( <i>i.e.</i> , Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.	[Y]
11	The Abstract section is formatted according to the article-specific style (structured <i>vs</i> unstructured) and word count thresholds, as follows: <u>Commentary</u> , <u>Frontier</u> , <u>Diagnostic Advances</u> , <u>Medical Ethics</u> , <u>Minireview</u> , <u>Review</u> , <u>Therapeutics Advances</u> , and <u>Topic Highlight</u> :  Non-structured abstract that is no less than 200 words. <u>Field of Vision</u> , <u>Case Report and Letter to the Editor</u> : Non-structured abstract that is no less than 150 words.	[Y]

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com https://www.wjgnet.com

	Research articles: Structured abstract with subsections for AIM (no	
	more than 20 words); METHODS (no less than 80 words); RESULTS	
	(no less than 120 words); and CONCLUSION (no more than 26	
	words).	
	The 'Key words' list provides 5-10 keywords that reflect the main	
12	content of the study. The first letter of each keyword is capitalized,	[Y]
	and each keyword is separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The name	
	of the first author should be typed in bold letters; the family (sur)	
	name of all authors should be typed with the first letter capitalized,	
40	followed by their abbreviated first and middle initials. For example,	
13	an article by Jae Moon Yoon, Ki Young Son, Chun Sick Eom, Daniel	[Y]
	Durrance, Sang Min Park will be written as Yoon JM, Son KY, Eom CS,	
	Durrance D, Park SM. Pre-existing diabetes mellitus increases the risk	
	of gastric cancer: A meta-analysis. World J Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the study	
14	that outlines the most innovative and important arguments and core	[Y]
	contents of the paper and will serve to effectively attract readers.	
	The 'INTRODUCTION' section clearly describes the relevant	
15	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the exception	
	of rare instances of seminal literature citations. All technical terms	
	and/or abbreviations are explained and/or defined, with the full	
	name of abbreviations given upon first appearance in the text and the	[Y]
	abbreviation presented in parentheses [i.e., "computed tomography	
	(CT)"]. First-person pronouns (e.g., 'I', 'we') are used appropriately to	
	clearly indicate the work performed by the author(s). When	
	weaknesses of previous studies are described in the text to highlight	
	the innovations related to the current study, the information is	
	presented carefully.	
	ı J	

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	The 'MATERIALS AND METHODS' section clearly and accurately	
16	describes all materials and methods used to obtain the data presented	[N]
	in the article and is adequate for a reader to repeat the study.	
	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have scientific	
	significance are emphasized. Data is presented in either the text, a	
17	table or figure (i.e., chart, diagram, graph or image), but is not	[N]
	repeated among each. Information presented in the tables and figures	
	clearly describes the trends, meaning, and inferences. Results	
	described in textual form are accurate, concise and clear.	
	Statistical symbols are accurate. Statistical significance is expressed as	
	$^{\mathrm{a}}P$ < 0.05, $^{\mathrm{b}}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted). If	
18	there are other series of $P$ values, $^{\rm c}P$ < 0.05 and $^{\rm d}P$ < 0.01 are used, and	[N]
	a third series of $P$ values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.	
	Statistical data is expressed as mean ± SD or mean ± SE.	
	The 'DISCUSSION' section (1) describes the main purpose and	
	hypothesis of the study; (2) summarizes the most important results; (3)	
	illustrates and explains the results (but does not simply repeat the	
19	data) and draws conclusions or inferences based on the results; (4)	[V]
19	points out the limitations of the study and their impact on the results,	[Y]
	as well as proposes further advice on future research topic(s) or	
	direction(s); and (5) describes the theoretical significance and practical	
	value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
	individuals or organizations for technical support (i.e., providing	
20	instrumentation, equipment or experimental materials, and/or	[N]
	assistance in experimental work), non-technical services (i.e., useful	
	inspiration, suggestions, guidance, or review), and/or any other	
	· 1	
	auxiliary work.	

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	articles in accordance with the specified format.	
	The 'REFERENCES' section lists the references in the Vancouver style.	
	This style uses Arabic numeral in-text citations based on the order of	
	the first appearance of a source in the text. For citations where the	
	author's name is indicated in the text, a superscript number should be	
	placed following the name ( <i>i.e.</i> ., "Pang et al"). For citations where no	
22	author is indicated, a superscript number should be placed at the end	[Y]
	of the sentence. Respective examples are: "Ma <sup>[1]</sup> reported", "Pan et	
	al <sup>[2-5]</sup> indicated"; "PCR has a high sensitivity <sup>[6,9]</sup> ." No superscript	
	numbers are used when the reference number is described in the text;	
	for example, "The experimental method used has been described in	
	reference [8]." The style of reference citations in tables is the same as	
	that in the text (e.g., Pan et al <sup>[2-5]</sup> , please see reference [8]).	
	Journal references have been verified to ensure that there are no	[Y]
	duplicate references and that the PMID numbers are correct. For	
	references not yet included in PubMed: the name of Chinese journals	
22	is spelled out using Chinese Pinyin, with the first letter of each word	
23	capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in	
	other languages are listed according to indexing information retrieved	
	from Google. Book references are presented with all the information	
	relevant to the electronic version.	
	The number of cited references is appropriate for the article type, as	
24	follows:	[Y]
	Commentary: no less than 50;	
	Review: no less than 100;	
	Article: no less than 30/26;	
	Case Report and Letter to the Editor: no less than 1.	
	The ethics-related statements are provided in accordance with the	
25	manuscript type (e.g., Manuscript NoInstitutional review board	[N]
	statement, Manuscript NoAnimal care and use statement, etc.).

The names of the peer reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL).  The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, *, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A:;  B:; C:; D:; E:; F:  Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis diagrams, PCR amplification curves, and survival curves.  The author(s) highlighted the changes made to the manuscript according to the peer-reviewers' comments are consistent with the changes made to the manuscript is provided (file name: Manuscript NoReview; e.g., 870-Review).  The revised manuscript is provided (file name: Manuscript NoReview; e.g., 870-Answering reviewers).  The related ethics and relevant documents are provided, such as (1) Approved grant application form(s) or funding agency copy of any approval document(s) (file name: Manuscript NoGrant application form(s)); (2) Biostatistics review certificate (file name: Manuscript NoBiostatistics statement); (3) Conflict-of-interest statement (file name: Manuscript NoClinical trial registration statement (file name: Manuscript NoClinical trial			
the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL).  The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, ×, +, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A:; B:; C:; D:; E:; F:  Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis diagrams, PCR amplification curves, and survival curves.  The author(s) highlighted the changes made to the manuscript according to the peer-reviewers' comments.  The responses to the peer-reviewers' comments are consistent with the changes made to the manuscript.  The revised manuscript is provided (file name: Manuscript NoReview; e.g., 870-Review).  The letter of peer-reviewers' comments is provided (file name: Manuscript NoPeer-review(s); e.g., 870-Peer-review(s)).  The response letter is provided (file name: Manuscript NoAnswering reviewers; e.g., 870-Answering reviewers).  The related ethics and relevant documents are provided, such as (1) Approved grant application form(s) or funding agency copy of any approval document(s) (file name: Manuscript NoGrant application form(s)); (2) Biostatistics review certificate (file name: Manuscript NoBiostatistics statement); (3) Conflict-of-interest statement (file name: Manuscript NoConflict-of-interest statement); (4) Clinical trial	26	The names of the peer reviewers and the scientific editor are present at	[V]
with their appearance and presentation in the text. Symbols in tables (e.g., +, -, x, ÷, *) correctly correspond to the definitions in the footnotes.
